# Push Boundaries with illari Threads

illari Threads is proud to offer the highest quality thread product combined with unparalleled physician support and training through its affiliate company, Empire Medical Training. Nowhere else will you have the resources so readily available to assist you in your practice. Our product line offers exceptional quality and the strongest tensile strength with a high USP designation. Our products are used by our physician faculty and have gone through extensive testing.

For nearly three decades, Empire Medical Training has responded to the needs of practitioners and developing our unique PDO Thread product line is no different. illari Threads has partnered with an ISO certified manufacturing plant in Korea to create and manufacture our thread design, utilizing specifications developed by our physician faculty.

illari Threads provides the most complete product line for facial and body Aesthetics. illari Threads offers the greatest selection and variety of thread types as well as many threads products unique to illari Threads. One of the illari Threads most popular thread is the illari Multi-Braided Mesh (I-MBM™). Unlike other popular threads, the illari I-MBM™ is the only product of its kind with 16 threads braided into one device/needle so you can deliver the maximum quality of threads in an area requiring maximum volume restoration.

Choose from a complete product line of Smooth (illari Pro Smooth Line™), barbed (illari Pro Barb Series™), twisted, as well as a complete spectrum of specialty products for the more advanced practitioner. Our specialty line includes two different categories of Nose Barb threads (for the tip and to contour the nose bridge), Eye Liners which are 31 gauge smooth threads for beneath the eye and other delicate areas of the face, as well as with Fox Eye and Cats Eye specialty threads. These latter two utilize reverse barbs and other unique design characteristics that ensure they do not migrate after insertion.

# About illari Threads

illari Threads is a U.S. based company affiliated with Empire Medical Training, a worldwide leader in medical education and procedural training founded by Dr. Stephen Cosentino nearly 30 years ago.

After extensive research, review, and testing of hundreds of PDO threads from common brands on the market, we understand what goes into making the highest quality PDO thread product.

We have learned through extensive usage, more than any other testing performed by a practice or physician, what the best features are required for

an exceptional PDO thread product. We have used this knowledge and experience to develop our own specialty PDO thread line with the highest standards in production, quality, safety, and strength, producing the most desirable outcomes for patients.

illari Threads distributes the most complete line of aesthetic PDO threads for facial rejuvenation, body lifting, contouring, and regeneration on the market. Our lifting threads and procedural techniques have been awarded numerous patents and international certifications including FDA Clearance, GMP, ISO 13485, KFDA, and CE Mark Designation.

## Mission Statement

**Our mission is to become the most trusted source of PDO threads by providing the highest quality product paired with an unbeatable support staff.** We provide all physicians and nurses access to resources such as vendor information, industry specific information, and knowledgeable product specialists offering product support.

With illari Threads, practitioners receive access to an invaluable network of similarly-minded individuals and practical tools through the Empire Medical Training Member's Portal. Additionally, various resources are offered that simply cannot be obtained from other sources. We strive to meet the most superior standards and provide our members with ample support in order to help them develop thriving aesthetic practices that offer unparalleled service, leading to outstanding results for patients.

### FDA Approval and Safety

illari Threads is one of the few companies that offers a fully FDA-cleared PDO thread product combined with cannula. illari Threads have been awarded numerous patents and international certifications including the FDA clearance, GMP, ISO 13485, KFDA, and CE Mark designation.

### Education

When you are looking to learn more about PDO Threads, illari Threads and Empire Medical Training have got you covered. We provide quality training nationwide for all levels from beginner to expert through our comprehensive program which covers everything from basic vector techniques to advanced proprietary methods. With us, there is no shortage of learning opportunities when it comes to mastering the art of PDO threading!

### Quality

illari Threads have garnered global acclaim, being trusted and employed by medical professionals all around the world—including Empire Medical Training’s faculty. Our diverse range of threads provide options for practitioners at any level: cutting or molded barbs, multi-braided mesh, embossed—whatever you need to meet your patient’s needs with top-tier quality guaranteed.

### Setting New Marketing Standards

Practitioners, unlock the hidden potential of your aesthetic practice with illari Threads! We provide you with hundreds of Social Media Marketing templates, a striking and branded illari threads banner, patient brochures, consent forms, documents—and much more. Our purpose is to help you thrive in your aesthetic practice without the hassle of marketing and let you focus on delivering quality treatments.

## Variety and Versatility

illari Threads' sutures have been designed to enhance and redefine the face and body with a wide array of sizes and types. Our threads can effectively contour, lift up skin tissue, as well as revitalize your visage for an improved appearance. We have smooth or embossed threads with 360° Cog cutting type barbs as well as V1 & V2 molded type barbs for practitioners to choose from. Furthermore, we provide different thread thickness' and lengths so you can always select the best option for your patient's desired result!

## Specialty Threads

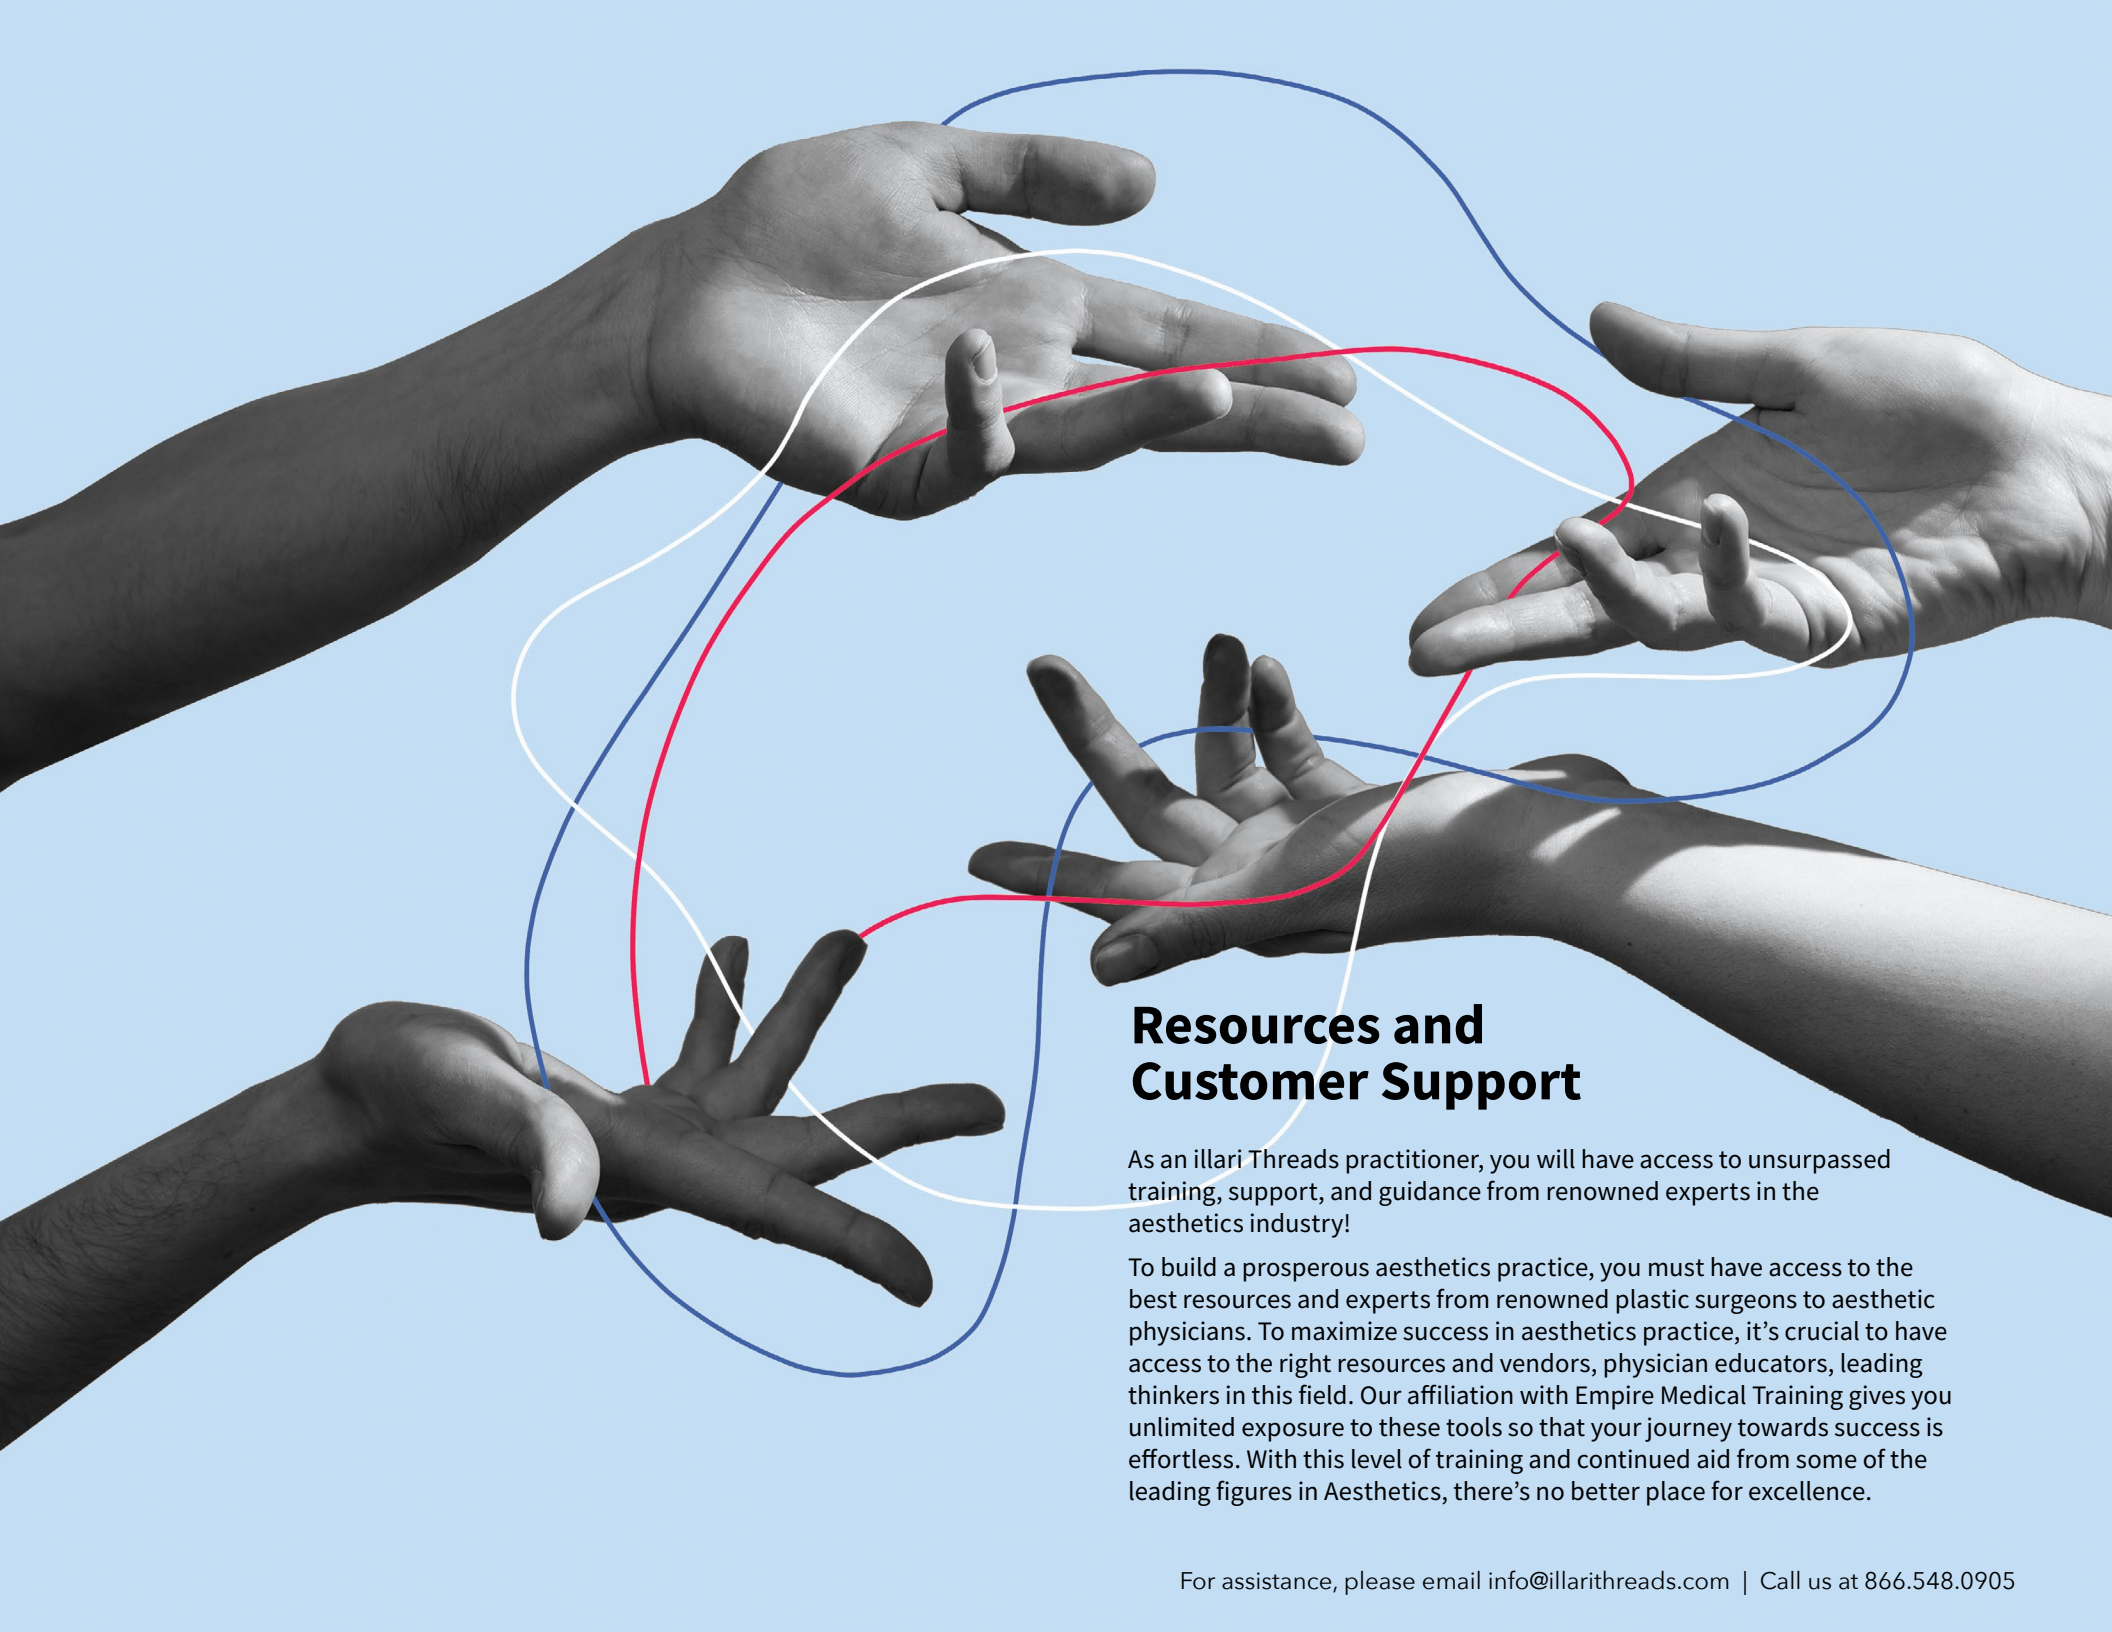

In addition to a full line of smooth, screw, and barbed threads, illari Threads offers a specialized product line of threads for advanced practitioners to utilize. The illari Specialty Threads line provides effective treatments for the eyes, brows, nose, and other areas of the face. This line also includes specialized thread options for some of the most challenging and demanding areas, with thorough training so practitioners can deliver a patient's desired results.

## **Earn Significant Profit with PDO Thread Procedures**

By utilizing illari Threads, practitioners can save significantly due to our influential presence in the industry and exclusive distribution of these quality threads.

## **Resources and Customer Support**

As an illari Threads practitioner, you will have access to unsurpassed training, support, and guidance from renowned experts in the aesthetics industry!

To build a prosperous aesthetics practice, you must have access to the best resources and experts from renowned plastic surgeons to aesthetic physicians. To maximize success in aesthetics practice, it's crucial to have access to the right resources and vendors, physician educators, leading thinkers in this field. Our affiliation with Empire Medical Training gives you unlimited exposure to these tools so that your journey towards success is effortless. With this level of training and continued aid from some of the leading figures in Aesthetics, there's no better place for excellence.

# Threads Product Line

## }} illari Pro Smooth Line™

The illari Threads Pro Smooth Line™ are quality smooth threads used for many areas of the face and body. This line includes monofilament threads (illari Pro Mono™ & illari Pro Screw™) for the natural collagen stimulation process and will dissolve over time (4–6) months.

### illari Pro Mono™

illari Pro Mono™, our smooth threads, can be used in areas to improve volume, texture, and skin laxity, and to create additional support for barbed threads. illari Pro Mono™ threads will dissolve over time (4–6) months while stimulating the body to produce collagen in the placement area. The patented design is available in multiple gauge sizes of 27G to 30G, with length combinations of 25mm to 60mm for both face and body applications.

### illari Pro Screw™

illari Pro Screw™ threads can be used in any area to improve volume, texture, and skin laxity, and to create additional support for barbed threads like our smooth (Pro Mono) threads. The difference is that our screw (twist) threads have their suture coiled more around a needle to give an extra boost toward collagen stimulation. Our illari Pro Screw™ is available in multiple gauge sizes of 27G to 29G, with length combinations of 25mm to 60mm for both face and body applications.

## }} illari Volume-Up Line™

The illari Threads Volume-Up Line™ are quality smooth threads used for various areas of the face and body. The Volume-Up line produces maximum collagen production for each thread used. The Volume-Up threads are designed to give more collagen stimulation and volumizing effect with their rough surface as well as having more tissue grabbing mechanism.

### illari Volume-Up Embossed™

illari Volume-Up Embossed™ thread is designed for enhanced soft tissue formation through a natural healing process after the placement of threads. The Embossed Smooth thread design is available in multiple gauge sizes of 25G to 29G and length combination of 25mm to 60mm for both face and body applications.

### illari Volume-Up Embossed Screw™

illari Volume-Up Embossed Screw™ thread is designed for enhanced soft tissue formation through a natural healing process after the placement of threads and accentuates features such as the vermilion border. The Embossed Screw thread design is available in multiple gauge sizes of 25G to 29G and length combination of 25mm to 60mm for both face and body applications.

## illari Pro Barb Series™

The illari Pro Barb Series™ includes both cutting and molded-type barbed with different shapes, lengths, and thicknesses to address all levels of thread providers for their different patient needs.

### illari Pro 6D 360° Cog™

illari Pro 6D 360° Cog™ is a 360-degree cutting type bi-directional barbed thread, which is the most versatile and conventional barbed threads. Providers may use this thread along their vectors to provide exceptional results for their patients. Available in sizes from 18G to 21G, lengths from 60mm to 100mm, and USP from 2 to 2-0.

### illari Pro Cog V1™

illari Pro Cog V1™ is our arrow-headed shape molded type barbed thread for maximum tensile strength and lifting effect. Used for areas where thread providers like to pull and fixate tissue. This thread is most recommended for advanced PDO thread providers when handling thicker tissue. Superior tensile strength and long-lasting results. Available in 19G 100mm, 19G 60mm, and 18G 100mm.

### illari Pro Cog V2™

illari Pro Cog V2™ is our razor-wire (Z shape) molded type barbed thread for maximum tensile strength and lifting effect. This molded type barbed thread provides maximum tensile strength with better distribution of stress among its strand. These threads interlock with tissue for a longer duration which produces a longer-lasting result. Available in 19G 100mm, 19G 60mm, and 18G 100mm.

## illari Specialty Threads™

The illari Specialty Threads™ line provides effective treatments for the eyes, brows, nose, and other areas of the face. This line includes specialized thread options for some of the most challenging and demanding areas for thread providers to deliver the result that their patients desire.

### illari EYE-Z™

illari Eye-Z™ is a multi-directional barbed thread specifically designed for the popular eye treatments such as the Cat's and Fox eyes. With its unique design and mechanism, illari Eye-Z™ thread will provide enhanced fixation of tissue above the brow. Available in 21G 60mm and 21G 90mm.

### illari Nose Cog™

illari Nose Cog™ is a uni-directional barbed thread specifically designed to be placed within the bridge and the columella of the nose for contouring. Ideal for patients needing a non-surgical rhinoplasty. Available in 19G 38mm and 19G 50mm.

### illari Multi-Braided Mesh™ (I-MBM™)

illari Multi-Braided Mesh™ is a thread with 16 of 7-0 smooth threads braided together inside a 19G blunt cannula. This mesh of smooth threads drastically increases the thread structure resulting in a thicker thread. After insertion, this thread provides the maximize stimulation of collagen production and volumizing effect. Available in 19G 38mm and 19G 60mm.

### illari Micro F™

illari Micro F™ is our micro cannula (blunt-L type) smooth thread for added safety around the eyes or in other highly vascularized areas to reduce the risk of edema and bruising. Available in 30G 25mm.

- **Video Library**—Hands-on footage and educational materials

## PDO Thread Lift Training Certification Courses LEVEL I, II & III

Empire Medical Training is the most sought-after educational organization for PDO Thread Lift Training. All programs are certified and provide **intensive lectures combined with live patient hands-on training.**

The training is unbiased, evidence-based training provided by top-tier physician instructors. It is available to physicians, nurses, and other health care practitioners.

**Empire Medical Training offers Three complete levels of PDO Thread lift training. Level One and Level Two** are comprehensive workshop programs offered throughout the United States just about every weekend.

**Level Three** is our most advanced PDO Thread Training program led by successful Aesthetic Physicians. Practitioners will share the unique experience of working closely with our Physician trainers, learning advanced procedures and techniques as well as many proprietary methods that our trainers have developed in their own Aesthetic centers. This program is designed for practitioners who have completed PDO thread training levels One and Two.

For over 25 years, Empire Medical Training has led the Aesthetics industry in providing aesthetic and medical education.

# PDO Threads Education

## LEVEL I & II

### PDO Thread Lift Training

**Level One PDO Thread lift training** is a certified program (as are all Empire programs) with a focus on using smooth threads to build collagen and shape the face as if using dermal fillers. There are many applications and benefits of using smooth PDO threads. The true aesthetic benefit of PDO threads occurs when the practitioner learns to use the combination of smooth and barbed (lifting threads). Level one provides training in smooth threads with an introduction to lifting threads. Level One is an intensive program where participants must have complete didactic and practical knowledge before progressing to Level Two. During Level One, you will be introduced to the various vectors and utilize them with select threads. Physician instructors work closely with attendees to help them learn proper technique and how to properly shape the face using vectors.

**Level Two PDO Thread training** is a much more advanced program where the practitioner will be presented with a comprehensive program to master smooth and barbed (lifting) threads. Practitioners receive more complete and detailed training on using vectors and are given proprietary vectors developed by the Empire Medical Training faculty for use in a practice setting. Practitioners will also be taught how to develop their own vectors and how to create proprietary treatment plans to utilize in their medical spas or aesthetic practices. The course is fully accredited for practitioners. You must attend all phases of the training and complete the focus exam and online testing in order to receive accreditation.

## LEVEL III

### Advanced PDO Thread Lift Training

**Level Three** is Empire Medical Training's most advanced, complete training in PDO Threads. This is a comprehensive, hands-on training program conducted by top-tier physician instructors. PDO Thread Training Level III is designed for practitioners who desire to expand their skills in Aesthetics and become experts in PDO threads. Trainees must have completed previous PDO Thread Training I & II or other hands-on course that includes placement of barbed threads. Practitioners will perform techniques on live patients in a small group environment (attendance limited to 4-6 participants). They will learn advanced techniques, proprietary methods, and more. They will also explore guidelines and protocols that provide lasting results. In addition, participants will be given detailed information on the various PDO products so they may choose the most optimal thread type and size of threads for their patients, and have a more complete understanding of the techniques they can offer in their practice.

## Gain Expertise & Hands-on Instruction

Upon completion of the Thread Lift workshops, practitioners will gain expertise and hands-on instruction in the following techniques:

### Face and Neck Techniques

1. Simple Cheek Vectors and Lifting
2. Full Face Techniques (Multi-Vector Cheek and Jaw)
3. Fox Eye (Cat's Eye) Techniques
4. Jawline Lifting and Contouring
5. Facial Volumizing Techniques
6. Neck Lift and Volumizing Techniques
7. Mid and Lateral Eyebrow Lift
8. Vectors for Neck and Jawline
9. Lips and Vermilion Border Enhancement
10. Volumizing Techniques—Décolleté
11. Volumizing Techniques—Perioral Region
12. Volumizing Techniques—Temporal Region

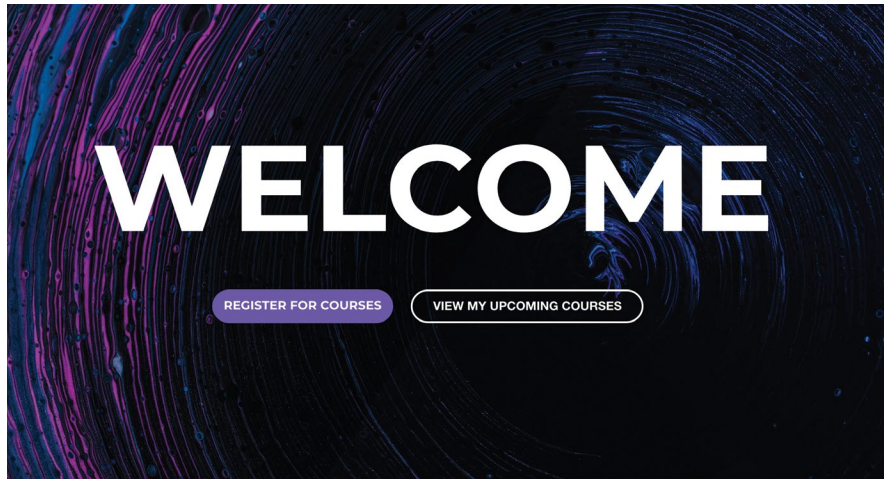

## Virtual Training

In addition to attending live hands-on workshops, **practitioners may also participate in Empire Medical Training's virtual live training courses.** For dates of all upcoming events, visit [Empiremedicaltraining.com/calendar](https://empiremedicaltraining.com/calendar). From the comfort of your home or office, using any mobile device, you can receive complete training from world class physician instructors. The virtual courses are live courses that are held on specific dates throughout the year. You may complete all didactic training and participate in live hands-on training at a later date to receive your certification. For refresher trainer, our virtual training options are also a great alternative to live in person training events.

## Video-On-Demand

This unique service is a **highly popular option for practitioners due to the convenience of the Video-On-Demand option**. Empire Medical Training offers the most complete selection of training options in all educational courses in Aesthetics from beginner to the most advanced topics (also pain management, surgery, anti-aging, and more).

## Video Library

For over 20 years, **Empire Medical Training has increased the scope of our Video Library to include topics from all areas of our training roster**. If you are an Aesthetics practitioner, you will no doubt want to access the video library to reference various topics in Aesthetics as well as to learn new methods, new pearls, and discussions from high profile thought leaders.

## The Empire Portal™

**The Empire Medical Training Portal is a highly robust educational platform exclusively available to Empire patrons and illari Threads' clients**. Through this portal, practitioners are provided a wealth of resources and information regarding PDO threads and other aesthetic topics. In addition to training videos, online testing, and other educational tools, the portal provides a host of tools you will need in your practice such as consent and treatment forms and much more.

## Customized Preceptorships One-On-One Training

Practitioners commonly choose our **preceptorship training option** because of the many benefits and conveniences offered to the practitioner. The program is fully customizable so you may learn any PDO thread procedure you wish and perform procedures through live patient training. Whether you are a novice injector or experienced practitioner, our physician trainers are renowned aesthetic physicians and expert practitioners, are practice owners, and have dedicated years of experience performing aesthetic procedures. The training may be conducted on a one-on-one basis or up to three practitioners may be trained at one time.

## State-of-the-Art Training Facility

Empire Medical Training has recently opened our world class, state-of-the-art aesthetic training center in Fort Lauderdale, Florida. This location is equipped with everything needed to operate a high-level medical spa or aesthetic practice. With our reputation and years of experience in the Aesthetics industry, we are fortunate to be sponsored by numerous vendors and equipment companies so when you visit our center you will also have the opportunity to learn about various equipment options.

The training itself is vast and we offer hands-on training in all areas of aesthetics, from the neurotoxins to cosmetic laser, and naturally all the injectable procedures such as with PDO threads.

A distinguishing feature of the Empire Medical Training programs, besides the accreditation, is our world class elite “celebrity” physician faculty. These are expert physician trainers who operate highly successful aesthetic practices and who are also committed to serving Empire Medical Training’s educational needs for our attendees.

To schedule your VIP experience and receive your certification training in PDO threads, contact Empire Medical Training today and speak with a training coordinator.

## illari Threads **Benefits** with **Empire Medical Training**

### **Educational Tools & Resources**

Navigate through an array of free additional resources where you will find valuable information relating to our training in addition to Empire's physician portal containing videos, medical intake forms, and proprietary information.

### **Virtual-Training-Hub™**

Embrace Empire's acclaimed educational model in a manner that works best for you—while on the go, at lunchtime, or even from your own home. With this flexible structure and access to essential tips and trainings whenever it fits into your schedule, there is no better time than now to watch what you want and when!

### **One-On-One Preceptorship**

illari Threads has partnered with the Global Leader in Aesthetics Education, Empire Medical Training. Enjoy special access to these world-class physician trainers and set up your fully customizable training—in the comfort of your office or ours!

### **Employment Opportunities**

Experienced in PDO threads? illari Threads' students will receive the opportunity to partake in the Certified Faculty Instructor (CFI) program—a pathway to become part of our faculty. Join the illari Threads team!

### **Network with Colleagues and Thought Leaders**

Connect with committed and passionate practitioners across the country! Share insights, advice, and continue learning from each other outside of the workshop.

### **Special Offers on Staff Training**

Share the wealth of knowledge gained at Empire Medical Training with the rest of your staff or team and save!
